

Product Spotlight

Breast Cancer Specimen Folio Biosciences is proud to provide the scientific community with quality driven breast cancer specimen to further your research needs. Whether your research requires frozen specimen, a single tissue section, or TMAs, Folio has thousands of breast cancer samples, some specimen with up to 25 years of follow up data. To learn more about our breast cancer capabilities go to [here](#).

Photo Contest

Folio has extended our microscopy photo contest until December 31, 2009! Folio is looking for the most beautiful histology shots from your lab. The winner will receive a Nikon D300 camera. To enter send your photo to mollie@foliobio.com and include your name, the name of your company, and contact information. For full rules and regulations please go to www.foliobio.com/photocontest.

Announcements

Folio Biosciences is dedicated to providing the research community with easily accessible, reliable, clinical specimen. To aid in our mission, we have recently lowered our prices by up to 30% for specimen in our online Human Tissue Catalog. The Human Tissue Catalogue is a convenient and economical way to purchase tissue sections representing both normal human organs and various types of cancer specimen, with new specimen added continually. For easy, secure online ordering, go to [Tissue Procurement](#).

Promotions

Folio is giving our clients an incredible opportunity to save. Folio is offering 15% off Single Tissue Section sections (min. 5 slide order). Promotion ends October 31, 2009. When ordering reference discount code **fall1275**. Call Folio, at (614) 448-9187 to place your order.

Advantages of using Archival Formalin Blocks for your biomarker study:

1. Immediate availability of tissue for research
2. Possibility of clinical follow up data including response to drugs and progression data (excellent clinical annotations)
3. Recent technology allows purification of biomarkers from FFPE tissue including DNA, RNA, microRNA & protein
4. Tissue stability may provide benefits over frozen tissue for additional experiments
5. More economical than frozen specimen
