Product Spotlight

Folio announces our new Tissue Microarrays. Our Folio manufactured TMAs are the highest standard of quality for an affordable price. Costing \$2-\$3 per case/slide, our TMAs focus on 8 major cancers that you use in your research. To view additional information regarding our new TMAs go to www.folobio.com/foliotmas.

Advantages of Tissue Microarrays

Since TMAs were introduced in 1998, their use has grown immeasurably. TMAs are exceptional resources if you're short on time, need consistency, want to screen many patients, want to save antibody resources, and have a limited budget.

Some major advantages in using Folio TMAs:

- High throughput analysis of tissue sections on a single slide
- Pathology reviewed every 50 microns
- Antigens retained for immunohistochemistry (IHC)
- Expertly dissected tissue from specific regions of interest
- Detailed pathology information provided for each specimen
- Saves time, cost, and reagents
